KAUSTUBH THAKUR

kaustubhthakur66@gmail.com | **ph no : 8087726452** | kaustubh.github | kaustubh.linkedin | Kaustubh.dev

SKILLS

Languages : Javascript, C++, Python, C#, SQL, Typescript
Frameworks : React.js, Node.js, Express.js , Asp.Net Core, Next.js, Vue.js
Databases : Redis, MongoDB, Postgresql, Firebase, SQLServer, MySql
Others : Html, Css, Tailwind Css, Git, Prisma, Redux, CI/CD ,MQTT ,Docker , Postman, Linux, Cloudinary
CS Core & Courses : Data structures and Algorithms, Operating Systems, Computer Networks, OOP, Database Management System Probability and statistics, Linear Algebra, Computer Organization and Architecture, Compiler Design, Digital Logic Theory of computation, Discrete mathematics

EXPERIENCE

Celusion Technologies | Thane, India **Oct 2025 - Present**
Software Developer
• Developed and maintained enterprise-grade applications using C#, ASP.NET Core,Vue.js, Docker, Linux SQL Server, HTML,Rabbitmq and Postman, delivering scalable backend systems and high-quality software solutions.
• Designed and integrated RESTful APIs, optimized database interactions, and built secure, modular architectures to enhance application performance, maintainability, and cross-service communication. .
• Contributed to the development, deployment, and support of real-time production applications, delivering new features, resolving complex technical challenges, and improving system reliability and user experience. .
• Collaborated directly with clients to troubleshoot and resolve issues in UAT, Dev and Production environments, ensuring timely bug fixes, smooth releases, and improved end-user experience.

Autosync | Mumbai, India **Aug 2025 - Oct 2025**
Fullstack Developer
• Designed, developed, and optimized multiple RESTful APIs to enhance system performance, scalability, and reliability.
• Gained extensive hands-on experience with MQTT, Firebase, Express.js, React.js, Postman, and Node.js, building and rigorously testing real-time, scalable applications .
• Developed the IconSelector application using React and TypeScript, enabling users to design customizable panel variants based on their preferences and export finalized configurations in PDF format.

PROJECTS

FootBuzz | Github **June 2026**
• Developed a football prediction application using XGBoost and Logistic Regression to forecast match outcomes and goal projections, with secure authentication and multi-league support.
• Implemented community features enabling users to vote on match winners, share predictions, and engage with community-driven insights.
Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, SQL, Python, JavaScript, CSS.

Megh | Github **Nov 2026**
• Developed Megh, a unified cloud storage platform that integrates multiple cloud accounts, including Google Drive and OneDrive, into a single dashboard to monitor storage quotas, track used space, and manage combined storage capacity.
• Integrated multiple cloud accounts with storage analytics and centralized file management. **Tech Stack:** Next.js, ASP.NET Core, C#, PostgreSQL, SQL, JavaScript, TypeScript, CSS, HTML.

EigenX | Github **July 2026**
• Developed a Mental Math application with three difficulty levels and a real-time multiplayer duel feature, enabling users to enhance calculation speed and accuracy by competing against friends or randomly matched opponents in a gamified way
• Implemented a dynamic leaderboard and user profile system featuring ranking levels and performance statistics.
Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, SQL, JavaScript, CSS, WebSockets.

QuickCache | Github **Aug 2024**
• Developed an in-memory key-value database in GoLang that supports concurrent access from multiple clients, implementing efficient data storage and retrieval mechanisms while ensuring thread-safe operations under high request volumes.
• Learn how tcp server binds to a port and accepts connections .

Nond | Github **Sep 2026**
• Built a full-stack inventory management platform for small retailers, featuring product and warehouse management, shelf/box-level tracking, supplier/customer management, and purchase/sales transactions.
• Developed dashboards for inventory insights, demand analysis, stock alerts, and Firebase push notifications.
Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, SQL, Firebase, TypeScript, JavaScript, Cloudinary.

EDUCATION

Bharati Vidyapeeth College of Engineering **November 2021 - June 2025**
Bachelor of Technology in Instrumentation and Controls Engineering **CGPA - 7.24**

ACHIEVEMENTS And CERTIFICATIONS

• Specialist on CodeForces Max Rating 1518.
• Top 3.26% on Leetcode, Max Rating 1965.
• Green coder on Atcoder, Max Rating 1091.
• Secured 1127th ,1289th , 1439th Global Rank in Leetcode 153 , 151 ,190 Biweekly Contests
• Secured 1073th Global Rank in Educational Codeforces Round 1121
• Level 4 Course Certification from TLE Eliminators and 0-100 cohort Certification from 100xDevs
