[kaustubhthakur66@gmail.com](mailto:kaustubhthakur66@gmail.com) | ph no : 8087726452 | [kaustubh.github](https://github.com/kaustubh) | [kaustubh.linkedin](https://www.linkedin.com/in/kaustubh)

## SKILLS

**Languages** : Javascript, C++, Python, C#, SQL

**Frameworks** : React.js, Node.js, Express.js , Asp.Net Core, Next.js, Vue.js

**Databases** : Redis, MongoDB, Postgresql, Firebase, SQL Server, MySql

**Others** : Html, Css, Tailwind Css, Git, Prisma, Redux, CI/CD ,MQTT ,Docker , Postman, Linux, Kubernetes

**CS Core &** : Data structures and Algorithms, Operating Systems, Computer Networks, OOP, Database Management System

**Courses** : Probability and statistics, Linear Algebra, Computer Organization and Architecture, Compiler Design

## EXPERIENCE

**Autosync | Mumbai,India**

**Aug 2025 - Oct 2025**

**Fullstack Developer**

- Designed, developed, and optimized multiple RESTful APIs to enhance system performance, scalability, and reliability.
- Gained extensive hands-on experience with MQTT, Firebase, Express.js, React.js, Postman, and Node.js, building and rigorously testing real-time, scalable applications .
- Developed the IconSelector application using React and TypeScript, enabling users to design customizable panel variants based on their preferences and export finalized configurations in PDF format.

**Celusion Technologies | Thane, India**

**Oct 2025 - Present**

**Software Developer Trainee**

- Developed and maintained enterprise-grade applications using C#, ASP.NET Core, Vue.js, SQL Server, HTML,Rabbitmq and Postman, delivering scalable backend systems and high-quality software solutions.
- Designed and integrated RESTful APIs, optimized database interactions, and built secure, modular architectures to enhance application performance, maintainability, and cross-service communication. .
- Contributed to the development, deployment, and support of real-time production applications, delivering new features, resolving complex technical challenges, and improving system reliability and user experience. .
- Collaborated directly with clients to troubleshoot and resolve issues in UAT and production environments, ensuring timely bug fixes, smooth releases, and improved end-user experience.

## PROJECTS

**FootBuzz | [Github](#)**

**May 2026 - June 2026**

- Developed a football prediction application that analyzed match data to forecast winning outcomes and goal projections, using XGBoost and Logistic Regression models .
- Enabled users to vote on predicted match winners, engage with community-driven insights, and share predictions seamlessly across a broader audience.Incorporated with secure authentication, comprehensive multi-league support.
- Tech Stack: Next.js,Node.js , Express.js,Postgresql,Sql,Python,Javascript,Css

**EigenX | [Github](#)**

**July 2026 - July 2026**

- Developed a Mental Math application with three difficulty levels and a real-time multiplayer duel feature, enabling users to enhance calculation speed and accuracy by competing against friends or randomly matched opponents in a gamified way
- Implemented a dynamic ranking dashboard and user profile system featuring ranking levels,user statistics and many more
- Tech Stack : Next.js,Node.js , Express.js , Postgresql , Sql , Javascript , Css,WebSockets

**QuickCache | [Github](#)**

**Aug 2024 -Aug 2024**

- Developed an in-memory key-value database in GoLang that supports concurrent access from multiple clients, implementing efficient data storage and retrieval mechanisms while ensuring thread-safe operations under high request volumes.
- Learn how tcp server binds to a port and accepts connections .

**Nond | [Github](#)**

**Aug 2026 - Sep 2026**

- Built a full-stack inventory management platform, for small retailers, enabling store onboarding, product and warehouse management, shelf/box-level inventory tracking, suppliers, customers, and purchase/sale/stock-adjustment transactions. .
- Designed an AI-driven business intelligence layer that analyzes transaction history and inventory data to generate monthly insights, demand predictions, stock alerts, with dashboards, reports, and Firebase push notifications for vendors.
- Tech Stack : Next.js, Node.js, Express.js, PostgreSQL, SQL, Firebase, Python, TypeScript, Javascript, Docker

## ACHIEVEMENTS And CERTIFICATIONS

- Specialist on [CodeForces](#) Max Rating 1471.
- Top 3.26% on [Leetcode](#), Max Rating 1955.
- Green coder on [Atcoder](#), Max Rating 1091.
- Secured 1127th and 1289th Global Rank in Leetcode 153 and 151 Biweekly Contests
- Secured 1371 Global Rank in Educational Codeforces Round 164
- Secured 1007th and 1046th Rank in AtCoder Beginner Contest 448 and 458
- Level 4 Course [Certification](#) from TLE Eliminators
- 0-100 Course [Certification](#) from 100xDevs

## EDUCATION

**Bharati Vidyapeeth College of Engineering**

Bachelor of Technology in Instrumentation and Controls Engineering

**November 2021 - June 2025**

**CGPA - 7.24**
